ISACA AT LUMIFY WORK

ISACA provides practical guidance, benchmarks and other effective tools for all enterprises that use information systems. Through its comprehensive guidance and services, ISACA defines the roles of information systems governance, security, audit and assurance professionals worldwide.

Lumify Work is an Accredited Elite Partner of ISACA.

ISACA.
Accredited Elite Partner

WHY STUDY THIS COURSE

Gain knowledge and experience to demonstrate your understanding of the relationship between an information security program and broader business goals and objectives as you prepare for the Certified Information Security Manager (CISM) certification.

It distinguishes you as having not only information security expertise, but also knowledge and experience in the development and management of an information security program. The uniquely management-focused CISM certification promotes international security practices and recognises the individual who manages, designs, oversees and assesses an enterprise's information security.

This course is an intensive, four-day review program designed to prepare professionals for the Certified Information Security Manager exam.

This course includes a digital courseware manual and access to the CISM Questions, Answers and Explanations (QAE) database for 12 months.

Please note: The exam is not included in the course fee but can be purchased separately. Please contact us for a quote.

WHAT YOU'LL LEARN

After completing this course, participants should be able to:

> Explain the relationship between executive leadership, enterprise governance and information security governance

> Outline the components used to build an information security strategy

> Explain how the risk assessment process influences the information security strategy

> Articulate the process and requirements used to develop an effective information risk response strategy

Certified Information Security Manager (CISM®)

> Describe the components of an effective information security program

> Explain the process to build and maintain an enterprise information security program

> Outline techniques used to assess the enterprise's ability and readiness to manage an information security incident

> Outline methods to measure and improve response and recovery capabilities

"

My instructor was great being able to put scenarios into real world instances that related to my specific situation.

I was made to feel welcome from the moment I arrived and the ability to sit as a group outside the classroom to discuss our situations and our goals was extremely valuable.

I learnt a lot and felt it was important that my goals by attending this course were met.

Great job Lumify Work team.
